TECHNOLOGY · INNOVATION · INTELLIGENT

COMPANY INTRODUCTION

Aochuang was founded in 2005 and has focused on packaging container decoration for over 20 years, with a core specialization in bottle screen printing machines. We provide complete solutions ranging from semi-automatic to fully automatic, and from single-color to multi-color full-servo bottle screen printing systems. Our machines are designed to print on round, square, flat, oval, and irregular-shaped bottles, serving industries such as cosmetics, personal care, household & home care, beverage & spirits, pharmaceuticals, and nutraceuticals. With stable motion control, precise positioning and registration, and custom fixtures, we help customers achieve sharp, consistent print quality, stable yield, and fast changeovers.

In addition to bottle screen printing equipment, Aochuang offers integrated modules such as hot stamping, UV/hot-air/IR curing, flame/plasma surface treatment, and vision positioning & inspection, enabling complete bottle decoration lines. We also maintain a mature product portfolio in tube and container automation equipment, including tube extrusion systems, sheet welding tube-forming machines, tube screen printing/hot stamping machines, and tube/bottle vision inspection systems—providing customized equipment and process solutions based on each customer’ s production needs.

27 years of professional R&D and manufacturing of equipment
